Here is the story of a little mouse with a big talent! As the runt of his family, Wolfgang Amadeus Mouse ("Wolf," for short) has a big name to make up for his small size. But the name fits: While his siblings like to race each other across the piano keys, he would rather listen to Mrs. Honeybee, the lady of the house, play music on them. Then one day, in a moment of musical passion, Wolf throws his head back--and to his total surprise, out of his mouth comes a beautiful voice! Soon he's singing everything from "Three Blind Mice" to Chopin to the Beatles, all to Mrs. Honeybee's accompaniment. But Wolf's talents don't end there--his voice really is music to Mrs. Honeybee's ears when he uses it to rescue her after she takes a spill.

For ages, musicians and lay people have been asking musical questions: How does music work; why does this melody sell and not that one; what is an octave and why does it 'work'; why does our brain experience musical dissonance and off-key notes. What is harmony and why does it sound, well, harmonious? And on and on. Is it all subjective or is there some objective basis to the most mysterious of the arts. This book deserves 5 stars for just attempting to find the answers. The fact that it does, in fact, find them, doubles its value!
